

Table of Contents

BMC-2

- Elementary Failure Mechanisms in Thermally Stressed Models of Fiber Reinforced Composites
K. P. Herrmann and F. Ferber (Paderborn University, *Federal Republic of Germany*)
- Stable Microcracking in Cementitious Materials
H. Krenchel and H. Stang (Technical University of Denmark, Lyngby, *Denmark*)
- Structural Characterization of Steel Fibre Reinforced Concrete
P. Stroeven (Delft University of Technology, *The Netherlands*)
- Influence of Fibre Orientation on Mechanical Strength of Fiber Reinforced Concrete
G. Debicki, P. Hamelin (Institut National des Sciences Appliquees de Lyon, Villeurbanne, *France*)
and J. Raclin (Institut Universitaire de Technologie, Grenoble, *France*)
- Optimal Fibre Orientation in Concrete-like Composites
M. Marks (Institute of Fundamental Technological Research, Warsaw, *Poland*)
- Finite Element Model for Short Fiber Reinforced Concrete
S. Majumdar, I. Banerjee and A. K. Mohan (Indian Institute of Technology, Kharagpur, *India*)
- Bending of Concrete and Reinforced Concrete Elements Partially Filled with Steel Fibres
K. Yamboliev (Bulgarian Academy of Sciences, Sofia, *Bulgaria*)
- Indentation Testing of SiC-Whisker Reinforced Al₂O₃ Composites
I.-L. Ekberg, R. Lundberg, R. Carlsson (Swedish Institute for Silicate Research, Goteborg, *Sweden*)
and R. Warren, Chalmers University of Technology, Goteborg, *Sweden*)
- The Influences of Al₂O₃ and CaSO₄ • 2H₂O on Hydrothermal Synthesis and Characterization of Compounds in System CaO-SiO₂-H₂O
C. Tashiro and H. Nishioka (Yamaguchi University, Ube, *Japan*)
- A New Model to Describe the Damage in a Laminated Carbon Fibre Reinforced Carbon Composite
C. Rief and K. Kromp (Max-Planck-Institut für Metallforschung, Stuttgart, *Federal Republic of Germany*)
- Utilization of Ceramic Engineering Materials under Extreme Conditions of Gas Abrasive Wear
V. Ya. Belousov and V. M. Philipenko (Ivano-Frankovsk Oil and Gas Institute, Ivano-Frankovsk, *USSR*)
- The Multi-level Study of Constituent-Structure-Interface-Mechanical Behaviour Relationships of Concrete Materials
Huang Yiun-Yuan (Tongji University, Shanghai, *PR China*)
- Numerical Analysis of the Stress Field Parameters in the Fracture Process Zones in Concrete
D. Stys (Technical University of Wrocław, *Poland*)
- Variational Inequalities in Brittle Fracture Mechanics
Le Khanh Chau (National Center for Scientific Research, Hanoi, *Vietnam*)
- Numerical Simulation of 3D Crack Formations in Concrete Structures
H. Schorn and U. Rode (University of Bochum, *Federal Republic of Germany*)
- Plastic Deformation under Mode I and Mode II Loading in WC-Co
S. Schmauder (Max-Planck-Institut für Metallforschung, Stuttgart, *Federal Republic of Germany*)

Strength Characteristics of WC-Co Composites

J. Dusza, M. Ruščák, L. Parilák, M. Šlesár (Institute of Experimental Metallurgy, Kosice, *Czechoslovakia*) and G. Leitner (Zentralinstitut für Festkörperphysik und Werkstofforschung, Dresden, *German Democratic Republic*)

Three-Dimensional Failure Modes in Double-Punch Indentation of Brittle Materials

A. Buczynski (Warsaw Technical University, *Poland*)

Fatigue Life of Diamond/Hard Alloy Composite Materials

N. V. Novikov, G. I. Chepovetskiy and V. N. Kulakovskiy (Academy of Sciences of the Ukrainian SSR, Kiev, *USSR*)

A Statistical Theory of Brittle Fracture

Ruifong Wu and Chun-Hang Qiu (Dalian Institute of Technology, *PR China*)

Prediction of Fatigue Tensile Crack Growth Using the Theory of Damage

J.-F. Destrebeco (Universite Blaise Pascal, Clermont-Ferrand, *France*)

Influence of the Material Structure on the Long Term Properties of the Concrete Composites in Bending

A. Burakiewicz (Institute of Fundamental Technological Research, Warsaw, *Poland*), L. Hebda and J. Piasta (Technical University of Kielce, *Poland*)

Models for Compressive Behavior Laws of Fiber Reinforced Concrete

B. Doan, G. Debicki and P. Hamelin (Centre d'Etudes et de Recherches sur les Materiaux Composites, Villeurbanne, *France*)

A Probabilistic Model for Damage of Concrete Structures

D. Breyse (Laboratoire de Mecanique et de Technologie, Cachan, *France*)

Tensile Strength of brittle Materials in the Deformation Field with a Gradient

K. M. Mianowski (Institute of Building Research, Warsaw, *Poland*)

Autogenous Healing of Plain Concrete

A. Moczko (Technical University of Wroclaw, *Poland*)

The Influence of Presence of Structure Defects on the Diamond-Containing Composite Fracture Toughness

A. Maistrenko (Academy of Sciences of the Ukrainian SSR, Kiev, *USSR*), K. Kromp and M. Muller (Max-Planck-Institut für Metallforschung, Stuttgart, *Federal Republic of Germany*)

Sintering of a Silicon Nitride Matrix Composite Reinforced with Silicon Carbide Whiskers

T. Kinoshita, M. Ueki and H. Kubo (Nippon Steel Corporation, Kawasaki, *Japan*)

Young's and Shear Moduli of Laminated Carbon/Carbon Composites by a Resonant Beam Method

A. Wanner and K. Kromp (Max-Planck-Institut für Metallforschung, Stuttgart, *Federal Republic of Germany*)

The Influence of the Dispersed Phase Particles Cracking on a Change of the Elastic Modulus in a Brittle Composite

N. V. Novikov, A. L. Maistrenko, G. P. Bogatyryova and E. S. Simkin (Academy of Sciences of the Ukrainian SSR, Kiev, *USSR*)

Structure and Properties of Silicon and Titanium Nitrides-Base Materials

V. V. Ivzhenko, M. A. Kuzenkova, A. A. Svirid and S. N. Dub (Academy of Sciences of the Ukrainian SSR, Kiev, *USSR*)

- Solid State Investigation of Ceramic-Metal Interface Bonding
U. Jauch and G. Ondracek (Rheinisch-Westfälische Technische Hochschule, Aachen, *Federal Republic of Germany*)
- Determination of Elastic Properties of Fibre Reinforced Composites and of their Constants
J. Piekarczyk and R. Pampuch (Institute of Materials Science, Cracow, *Poland*)
- Formation of Glass Fiber-Cement Paste Interfacial Zone and its Effect on the Mechanical Properties of Glass Fiber Reinforced Mortar
M. Kawamura and S. Igarashi (Kanazawa University, *Japan*)
- A Study on Fracture Process Zones in Concrete by Means of Laser Speckle Photography
Xu Shilang and Zhao Guofan (Dalian University of Technology, *PR China*)
- Strengthening the Interfacial Zone between Steel Cement Paste
Chen Zhi Yuan and Wang Nian Zhi (Tongji University, Shanghai, *PR China*)
- Debonding Processes between Steel Fibre and Cement Matrix
J. Potrzebowski (Institute of Fundamental Technological Research, Warsaw, *Poland*)
- The State of Crystallization of the Second Phase in Yttria and Alumina-Doped HPSN and its Influence on the Strength at High Temperatures 362
B. T. Bodur and K. Kromp (Max-Planck-Institut für Metallforschung, Stuttgart, *Federal Republic of Germany*)
- Influence of the Technology and Microstructure on Elastic Properties of Sintered Copper Determined by Means of Resonance Method
L. Radziszewski and J. Ranachowski (Institute of Fundamental Technological Research, Warsaw, *Poland*)
- Properties of γ' - α Eutectic Composite
K. Kovacova (Institute of Materials and Machine Mechanics of Slovak Academy of Sciences, Bratislava, *Czechoslovakia*)
- Application of High Strength Cement and Carbon Fiber Composite
K. Tomatsuri and K. Nagase (Taisei Corporation, Yokohama, *Japan*)
- High Strength Cement Paste
H.-E. Gram and K. Olsson (Swedish Cement and Concrete Research Institute, Stockholm, *Sweden*)
- Some Problems Concerning the Determination of the Impact Resistance of Steel Fibre Reinforced Concrete
W. Radomski (Warsaw University of Technology, *Poland*)
- Application of Computational Mechanics Related to Fracture Concepts and Reliability of Composites
C. Michel, J.-P. Sommer, W. Totzauer and K. Braemer (Academy of Sciences of GDR, Karl-Marx-Stadt, *German Democratic Republic*)
- On the Compatibility of Hasselman's Thermal Shock Damage Criteria with Fracture Mechanics
H.-J. Weiss and H.-A. Bahr (Zentralinstitut für Festkörperphysik und Werkstoffforschung der AdW der DDR, Dresden, *German Democratic Republic*)
- FE-Calculations Demonstrating the Influence of the Matrix Interface Layer of the Free Edge Stresses in a Laminated CFRC Composite
M. Lindner and K. Kromp (Max-Planck-Institut für Metallforschung, Stuttgart, *Federal Republic of Germany*)

- An Attempt to Evaluate the Intrinsic Strength and Strain of Carbon Fibres
W. Zurek and I. Krlicinska (Technical University, Lodz, *Poland*)
- Delamination of Polymer Composite Sandwich Structures: The Interaction of the Controlling Parameters
B. W. Staynes (Brighton Polytechnic, Brighton, *UK*)
- Failure Analysis of Composite Laminates with Free Edge
S. G. Zhou and C. T. Sun (Purdue University, West Lafayette, Indiana, *USA*)
- Macro-structural Effects in a Uniaxial Tensile Test on Concrete
D. A. Horduk (Delft University of Technology, The Netherlands) and H. W. Reinhardt (Darmstadt University of Technology, *Federal Republic of Germany*)
- Influence of Aggregate Size on the Post-Peak Tensile Behaviour of Concrete in Cyclic Tests
S. Wolinski (Technical University, Rzeszow, *Poland*)
- Fracture Behaviour of Plain Concrete in Bending
J. Kasperkiewicz (Institute of Fundamental Technological Research, Warsaw, Poland), P. Stroeven and D. Dalhuisen (Delft University of Technology, *The Netherlands*)
- Mix proportioning and Properties of Epoxy-Modified Mortars
Y. Ohama, K. Demura (Nihon University, Koriyama, *Japan*) and T. Ogi (Hasegawa Komuten Co. Ltd, Tokyo, *Japan*)
- Meaning of Synergy Effects in Composite Materials and Structures
L. Czarnecki (Warsaw Technical University, *Poland*) and V. Weiss (Czech Technical University, Prague, *Czechoslovakia*)
- Estimation of Type and Magnitude of Macrostructure Defects of Porous Concretes
V. A. Titov, T. P. Vaschenko, V. P. Varlamov and N. K. Sudina (Ail-Union Research Institute of Building Materials and Structures, Kraskovo, *USSR*)
- Investigations of the Influence of a Sort of Coarse Aggregate on Fracture Toughness of Concrete
A. Bochenek and G. Prokopski (Technical University of Czestochowa, *Poland*)
- Fracture Mechanics of Micro-concretes
R. Frackiewicz and D. Wala (Technical University of Wroclaw, *Poland*)
- Loading Rate Sensitivity of Concrete-like Composites under Tensile Loading
M. A. Glinicki (Institute of Fundamental Technological Research, Warsaw, *Poland*)
- Criterion of Crack Propagation along the Interface between Dissimilar Media
M. Jaroniek (Technical University of Lodz, *Poland*)
- A Comparison of Theoretical Models for the Mixed Mode Fracture Behaviour of Thermosetting Resins
C. A. C. C. Rebelo (Secção Autónoma de Engenharia Mecânica— FCTUC, Coimbra, *Portugal*), P. M. S. T. de Castro and A. T. Marques (Departamento de Engenharia Mecânica—FEUP, Porto, *Portugal*)
- Mineral Polymer Matrix Composites
G. Patfoort, J. Wastiels, P. Bruggeman and L. Stuyck (Free University of Brussels, *Belgium*)
- Analysis of Material Efficiency of Resin Concretes
Z. Piasta (Technical University of Kieice, *Poland*) and L. Czarnecki (Warsaw Technical University, *Poland*)

New Method for Determination of Rock Coefficient of Critical Stress Intensity
Vu Cao Minh (National Center for Scientific Research, Hanoi, *Vietnam*)

Cracking Resistance of Concretes with Different Structural Heterogeneity
Yu. V. Zaitsev (Poly technical Institute, Moscow, *USSR*), K. L. Kovler (Research Institute of Building Materials and Structures, Kraskovo, *USSR*), R. O. Krasnovsky (Research Institute of Physico and Radio Technical Measurements, Moscow, *USSR*), I. S. Krol (Research and Project Institute, Orgenergostroy) and M. Tacher (Moscow Civil Engineering Institute, Moscow, *USSR*)

Fracture Resistance Evaluation of Steel Fibre Concrete
J. Kasperkiewicz (Institute of Fundamental Technological Research, Warsaw, *Poland*) and A. Skarendahl (Swedish Cement and Concrete Research Institute, Stockholm, *Sweden*)

Test Method and Application of Steel Fibre Reinforced Concrete
Zhao Guofan and Huang Chengkui (Dalian University of Technology, *PR China*)

Effect of Preparation Conditions on the Mechanical Properties of Low Porosity Hardened Cement Paste
Lu Ping, Fu Jung and Shen Wei (Tongji University, Shanghai, *PR China*)

Properties of Polymer-Modified Mortars Containing Silica Fume
Y. Ohama, K. Demura, M. Morikawa (Nihon University, Koriyama, *Japan*) and T. Ogi (Hasegawa Komuten Co. Ltd, Tokyo, *Japan*)

Calculation of Stresses in Laminated Materials under Transverse Bending
E. Bogdanovich and E. V. Yarve (Institute of Polymer Mechanics, Riga, *USSR*)
