

## Table of Contents

### BMC-3

- Fractals and Fractography in Concrete Technology  
P. Stroeven (Delft University of Technology, *The Netherlands*)
- Application of Fractography in Estimating Fracture Toughness of Cement-Based Materials  
G. Prokopski (Technical University of Czestochowa, *Poland*)
- Propagation of Cracks in Models of a Reinforced Concrete Beam  
A. Jaroniek (Technical University of Lodz, *Poland*)
- Ultimate Strength and Criterion of Interphase Cracks Propagation  
F. de Larrard, J. M. Torrenti (Laboratoire Central des Fonts et Chaussees, Paris, *France*) and M. Jaroniek (Technical University of Lodz, *Poland*)
- A Computer-Aided Method of Characterization of Damage in Glass/Cement Composites  
J. Francois-Brazier, Y. Surrel,\* J. Thiery and A. Vautrin\* Centre de Recherches de Pont-a-Mousson, France; \*Ecole des Mines de Saint-Etienne, *France*)
- The Influence of Heat Treatment on Stress-Evoked Destruction in Concrete  
J. Hoła and A. Pszonka (Technical University of Wroclaw, *Poland*)
- Study of Fracture Toughness and Fracture Energy by Means of Wedge Splitting Test Specimen  
Zhao Guofan, Jiao Hui\* and Xu Shilang (Dalian University of Technology, *PR of China*; \*Shengyang Civil and Architectural Design Institute, *PR of China*)
- Fracture Energy in Notched Steel Fibre Reinforced Concrete Beams  
A. M. Brandt (Institute of Fundamental Technological Research, Warsaw, *Poland*) and P. Stroeven (Delft University of Technology, *The Netherlands*)
- Fracture Mechanical Characterisation of Mineral Polymer Matrix Composites  
F. Theys, S. Faignet, G. Patfoort and J. Wastiels (Free University of Brussels, *Belgium*)
- Analysis of Fracture Toughness of High Density Concretes  
Z. Jamroży and Z. Rawicki (Technical University of Cracow, *Poland*)
- Fracture Energy and Tension Softening Diagrams of Various Kinds of Concrete  
K. Rokugo, Y. Uchida and W. Koyanagi (Gifu University, *Japan*)
- Reinforced Cementitious Composite Materials  
H. Mihashi (Tohoku University, Sendai, *Japan*)
- Fracture Toughness Characteristics ( $K_{Ic}$  and  $K_{IIc}$ ) of Tool Ceramics under Static and Dynamic Loads  
L. N. Devin and A. L. Maistrenko (Institute for Superhard Materials of the Ukrainian Academy of Sciences, Kiev, *USSR*)
- Two Phase Continuum Damage Mechanics: Application to Brittle Matrix Composites  
S. P. Joshi (University of Texas at Arlington, Texas, *USA*)
- Rate of Loading Effects on the Fracture of Cement Based Composites  
M. A. Glinicki (Institute of Fundamental Technological Research, Warsaw, *Poland*)
- Fatigue Strength of Concrete with Limestone Aggregate  
S. Sałaciak (Technical University of Cracow, *Poland*)

Fatigue Life of Steel Fibre Concretes

K. Komlos and B. Babal (Institute of Construction and Architecture, Bratislava, *Czechoslovakia*)

Observations on Crack Healing in Concrete

J. Kasperkiewicz (Institute of Fundamental Technological Research, Warsaw, *Poland*) and P. Stroeven (Delft University of Technology, *The Netherlands*)

Macromechanics Modelling of Steel Fiber Pull-out from Cementitious Matrices

Mallikarjuna and N. Banthia (Laval University, Quebec, *Canada*)

Bond between Concrete and Steel Reinforcing Bars under Impact Loading

C. Yan and S. Mindess (University of British Columbia, Vancouver, *Canada*)

Prediction of Crack Width in Conventionally Reinforced FRC

H. Stang (Technical University of Denmark, Lyngby, *Denmark*)

A New Approach to Bond and Cracks Problems in Reinforced Concrete

K. M. Mianowski (Building Research Institute, Warsaw, *Poland*)

Anchorage Capacity of Deformed Bars in Concrete

A. E. Allos and F. M. Hassan (University of Technology, Baghdad, *Iraq*)

Flexural Process and Electro-Acoustic Emission of Organic Fibres Reinforced Mortars (OFRM)

L. Rudzinski, L. Hebda and B. Turlej (Technical University of Kielce, *Poland*)

Application of Acoustic Emission Method to Determine the Limit of Proportionality and the Static Strength in Concrete

Z. Ranachowski (Institute of Fundamental Technological Research, Warsaw, *Poland*)

The Age Effect in Cracking Behavior of Plain Concrete

A. Moczko (Technical University of Wroclaw, *Poland*)

Numerical Simulation and Acoustic Emission Analysis for Investigating the Fracture Process in Concrete

V. Slowik and G. Kapphahn (Technische Hochschule, Leipzig, *Germany*)

Diagnostic Classification for Brittle Matrix Composites Assisted by Pattern Recognition and Rough Sets Analysis

Z. Piasta (Technical University of Kielce, *Poland*)

Microcracking and Durability of High Strength Concrete

J. P. Ollivier, V. Lumbroso, J. C. Maso and M. Massat (Laboratoire Materiaux et Durability des Constructions INSA, Toulouse, *France*)

Comparative Study of the Mechanical Damage and Durability of Glass/ Cement Composites

J. Francois-Brazier, P. Soukatchoff, J. Thiery (Centre de Recherches de Pont-à-Mousson, *France*) and A. Vautrin (Ecole des Mines de Saint-Etienne, *France*)

Alkali-Silica Reaction and Corrosion of Steel Reinforcement in Mortars Containing  $\text{CaCl}_2$

M. Kawamura, K. Takemoto\* and M. Ichiso (Kanazawa University, *Japan*; \*Ishikawa College of Technology, *Japan*)

Influence of Admixtures Improving the Technological Properties of SFRC

Z. Jamroży (Technical University of Cracow, *Poland*)

New Applications of High Strength Aramid Fiber Composites in Concrete Structures

R.-D. Boettcher (Akzo, Fibers and Polymers Division, Wuppertal, *Germany*)

- Toughness Characterization of Carbon Fibre Reinforced Cements  
N. Banthia, J. Sheng (Laval University, Ste-Foy, *Canada*), S. Mindess (University of British Columbia, Vancouver, *Canada*) and Y. Ohama (Nihon University, Koriyama, *Japan*)
- An Estimate of the Reinforcing Effect of Debonded Frictionless Platelets  
H.-J. Weiss (Institut für Werkstoffphysik und Schichttechnologie, Dresden, *Germany*)
- Mechanical Behaviour of Cement Based Composite  
P. Hamelin and P. Matray (Universite Claude Bernard Lyon I, Villeurbanne, *France*)
- High Strength Continuous Carbon Fiber Reinforced Cement Composite (CFRC)  
T. Nishigaki, K. Suzuki, T. Matuhashi and H. Sasaki (Taisei Corporation, Yokohama, *Japan*)
- Search for a Distribution Model of Fibres in Fibrous Concrete  
G. Debicki and P. Clastres (Laboratoire Betons et Structures, INSA, Villeurbanne, *France*)
- Deformation Process of Low MgO Ceramics Cylinder Subjected to Compressive Loading  
T. Sadowski (Lublin Technical University, Lublin, *Poland*) and Z. Mróz (Institute of Fundamental Technological Research, Warsaw, *Poland*)
- A Method of Diagnosis of Brittle Materials Frost Resistance Exemplified by Ceramic Bricks  
M. Zygadlo, Z. Piasta and A. Lenarcik (Technological University of Kielce, *Poland*)
- Microstructure, Strength and Fracture Toughness of  $\text{Si}_3\text{N}_4$  +  $\beta\text{-Si}_3\text{N}_4$  Ceramics  
J. Dusza (Institute of Experimental Metallurgy, Kosice, *Czechoslovakia*) and P. Sajgalik (Institute of Inorganic Chemistry, Bratislava, *Czechoslovakia*)
- Special Methods to Determine Strength of Brittle Tool Materials  
L. N. Devin, V. N. Kulakovskiy and N. V. Lamashevskaya (Institute for Superhard Materials of the Ukrainian Academy of Sciences, Kiev, *USSR*)
- Numerical Simulation of Caustics for a Branched Crack System in Models of Fibrous Composites  
F. Ferber and K. P. Herrmann (Paderborn University, *Germany*)
- Investigation of Stress Concentration in Carbon-Carbon  
A. Theuer, F. J. Arendts and W. Geiwiz (Universitat Stuttgart, *Germany*)
- The Statistical Nature of the Standardized Value of the Strength Margin  
T. D. Karimbaev (CIAM, Moscow, *USSR*)
- Constitutive Equations for Fibre-Reinforced Material  
S. Jemiolo (Warsaw University of Technology, *Poland*)
- Resistance to Failure of Fibrous Composite Material with Brittle Intermetallic Matrix  
I. M. Kopyev, V. I. Zhamnova and L. M. Ustinov (Moscow Institute of Metallurgy, *USSR*)
- Brittle Matrix Composites Optimization on the Structured Experimental-Statistical Models Basis  
T. V. Lyashenko (Odessa Institute of Civil Engineering, *USSR*)
- The Influence of the Infiltration with Carbon and Silicon on the Properties of 2D Carbon-Carbon Laminates  
I. Appel, A. Wanner (Max-Planck-Institut für Metallforschung, Stuttgart, *Germany*), K. Kromp (Institut für Festkörperphysik der Universität Wien, *Austria*) and U. Papenburg (Sintec Keramik GmbH, Buching, *Germany*)

Mechanical Behaviour and Oxidation Protection of a Carbon-Carbon Composite with Random Chopped Fibers

O. Kraft, A. Wanner (Max-Planck-Institut für Metallforschung, Stuttgart, *Germany*), K. Kromp (Institut für Festkörperphysik der Universität Wien, *Austria*) and U. Papenburg (Sintec Keramik GmbH, Buching, *Germany*)

Effect of Discontinuities in the Structure on Stiffness and Strength of Non-homogeneous Materials

V. Weiss (Czech Technical University, Prague, *Czechoslovakia*)

Vibrating and Mechanical Properties of Ferrite Concrete

M. Mayama (Hokkaido Institute of Technology, Sapporo, *Japan*) and M. Mori (Nippon Doro Co. Ltd, Sapporo, *Japan*)

Experimental Studies on Mechanical Properties of Ultra High-Strength Silica Fume Concrete

T. Kojima and N. Takagi (Ritsumeikan University, Kyoto, *Japan*)

A Geometrical Packing Model as a Basis for Composing Cement Paste Containing Clay for High Strength Concrete

M. Glavind and H. Stang (Technical University of Denmark, Lyngby, *Denmark*)

Polymers in the Renovation of Buildings Constructed of Natural Stone

P. J. Koblischek (Interacryl GmbH, Frankfurt I Main, *Germany*)

Polymer Concrete as an Alternative Material for Grey Cast Iron and Welded Steel Construction in the Machine Tool Industry

P. J. Koblischek (Interacryl GmbH, Frankfurt/Main, *Germany*)

Reduction in Setting Shrinkage of Polymethyl Methacrylate Concrete by Using Liquid Paraffin and Unsaturated Polyester Resin

Y. Ohama, K. Demura (Nihon University, Koriyama, *Japan*) and K. Nawata (Kajima Corporation, Tokyo, *Japan*)

Stress Analysis and Failure Mode of PIC Cylinders Subjected to Biaxially Splitting Loads

M. Kawakami, H. Tokuda, M. Kagaya (Akita University, *Japan*), N. Koyanagi and H. Shima (Chichibu Cement Co. Ltd, Kumagaya-shi, *Japan*)

Properties of Asphalt Emulsion Concrete Using Cement Filler

C. Tashiro and M. Ueda (Yamaguchi University, Ube, *Japan*)

Permanent Deformations in Pavement Asphalt Concretes

W. Grzybowska (Cracow Technical University, *Poland*)

Experimental Studies on Some Basalt Elastic Constants

I. Goia and E. Helerea (Transilvania University, Brasov, *Romania*)

Thermal Life-Time for Bakelites

E. Helerea (Transilvania University, Brasov, *Romania*) and A. Ifrim (Poly technical Institute, Bucharest, *Romania*)

Scattered Damage Mechanics of Concrete

A. S. Bychkov (All Union Scientific Production Association of Wall and Binder Materials, Moscow, *USSR*)
