

## Table of Contents

### BMC-7

- On a very high rate sensitivity of concrete failure at high loading rates and impact  
Janusz R. KLEPACZKO, *France*
- Design of Engineered Cementitious Composites (ECC) for processing and workability requirements  
Gregor FISCHER, Shuxin WANG and Victor C. LI, *USA*
- Drying shrinkage and crack width of an Engineered Cementitious Composites (ECC)  
Martin B. WEIMANN and Victor C. LI, *USA*
- Time-dependent response of highly ductile fiber-reinforced cement-based composites  
Sarah L. BILLINGTON and J. Matt ROUSE, *USA*
- Preliminary findings on size effect in ECC structural members in flexure  
M. LEPECH and V.C. LI, *USA*
- Static and dynamic properties of dry and wet cement mortar  
A. M. BRAGOV, L. KRUSZKA and A. K. LOMUNOV, *Poland and Russia*
- Investigation of static and dynamic loading of dioxide-zirconium ceramics and zirconium alumina concrete  
F. AKOPOV, A. M. BRAGOV, L. KRUSZKA, A. K. LOMUNOV, V. MINEEV, and I. V. SERGEICHEV,  
*Poland and Russia*
- Thermal shock crack propagation in functionally graded strip  
T. SADOWSKI and A. NEUBRAND, *Poland and Germany*
- Experimental testing of concretes subjected to impact and explosive loads  
M. BRAGOV, P. DEMENKO, L. KRUSZKA, A. K. LOMUNOV and R. REKUCKI, *Poland and Russia*
- Application of UV image analysis for evaluation of thermal cracking in concrete  
Michał A. GLINICKI and Agnieszka LITOROWICZ, *Poland*
- Assessing damage localization in concrete cylinders tested in compression  
Sunil PURI and W. Jason WEISS, *USA*
- Quantitative damage analysis of concrete  
Piet STROEVEN, *The Netherlands*
- Implications of the law of aggregation of matter in concrete technology  
Piet STROEVEN, *The Netherlands*
- The influence of particle size distribution on the microstructure of model cement  
Jing HU and Piet STROEVEN, *The Netherlands*
- Assessment of deteriorated concrete cover  
F. BUYLE-BODIN, B. PIWAKOWSKI, A. FNINE, M. GOUEYGOU and S. OULD-NAFFA, *France*
- Measurement of the durability of glass fibre reinforced concrete and influence of matrix alkalinity  
H. CUYPERS, J. WASTIELS, J. ORLOWSKY and M. RAUPACH, *Belgium and Germany*

- Bridge reconstruction with one layer concrete overlay  
Jure GALIĆ, I. BANJAD-PEČUR, N. ŠTIRMER and V. UKRAINCZYK, *Croatia*
- Cement-based thin bonded overlays: numerical study of the influence of bonds defect and fibre reinforcement  
Vincent SABATHIER, Jean-Louis GRANJU, Benoît BISSONNETTE, Anaclét TURATSINZE, and Basile TAMTSIA, *France and Canada*
- Debonding of FRC composite bridge deck overlay  
Rasmus WALTER, Henrik STANG, John Forbes OLESEN and Niels Jørgen GIMSING, *Denmark*
- Multi-exponential models as descriptive tools for plain concrete and FRC  
Ming Kien LEE and B. BARR, *UK*
- Design equations to predict the ultimate punching shear strength of slab-column connections  
D. THEODOROKOPOULOS and R.N. SWAMY, *Greece and UK*
- Mechanical properties of concrete reinforced with AR-Glass fibers  
Tejal DESAI, Rimpal SHAH, Alva PELED and Barzin MOBASHER, *USA and Israel*
- Behaviour of glass-filament-yarns in concrete as a function of time and environmental conditions  
Jeanette ORLOWSKY, U. ANTONS and Michael RAUPACH, *Germany*
- Design of hybrid-fiber reinforcement for shrinkage cracking by crack width prediction  
Michele F. CYR, Chengsheng OUYANG and Surendra P. SHAH, *USA*
- The cracking behaviour of SFRC beams containing longitudinal reinforcement  
David DUPONT and Lucie VANDEWALLE, *Belgium*
- Tensile behavior of a recycled concrete  
Hiroshi AKITA, Hideo KOIDE and Mitsuo OJIMA, *Japan*
- Toughening mechanisms in concrete: influence of aggregate type  
Vlastimil BÍLEK, Zbyněk KERŠNER and Pavel SCHMID, *Czech Republic*
- Failure of normal and high strength concrete under monotonic and cyclic tensile loading  
Christoph KESSLER-KRAMER, Viktor MECHTCHERINE and Harald S. MÜLLER, *Germany*
- The use of viscosity enhancing admixtures to improve the homogeneity of fibre distribution in steel fibre reinforced concretes  
Liberato FERRARA, *Italy*
- Optimisation of the rheological and fracture mechanical properties of lightweight aggregate concrete  
Victor MECHTECHERINE, Michael HAIST and Harald S.MÜLLER, *Germany*
- Design and testing of self-compacting SIFCON produced with low strength slurry  
Lucie SVERMOVA, Mohammed SONEBI and Peter J.M. BARTOS, *Czech Republic and UK*
- The influence of select composition factors on rheological properties of fibre reinforced fresh mortar  
Tomasz PONIKIEWSKI and Janusz SZWABOWSKI, *Poland*
- Mix design of the self-compacting concrete  
Maria KASZYŃSKA, *Poland*

- Influence of cement and superplasticizer on rheological properties of mortars  
Jacek GOŁASZEWSKI and Janusz SZWABOWSKI, *Poland*
- Analysis of concrete property fields and search for the best compositions using Monte Carlo method  
T. LYASHENKO, V. VOZNESENSKY, S. BOIKO, D. SHTAKELBERG, *Ukraine and Israel*
- Cement-based materials incorporating rubber aggregates: shrinkage length changes  
Anaclet TURATSINZE, Sandra BONNET and Jean-Louis GRANJU, *France*
- Advanced construction materials from fly ash  
Hwai-Chung WU and Peijiang SUN, *USA*
- Implications of maturity and ultrasonic wave speed measurements in QC/QA for concrete  
Cole GRAVEEN, W. Jason WEISS, Jan OLEK and Tommy NANTUNG, *USA*
- On the determination of elastic constants with brittle matrix composites  
Dieter LOIDL, Stephan PUCHEGGER, Herwig PETERLIK and Karl KROMP, *Austria*
- A mechanical study of reinforced-concrete beams repaired with composite sheets  
Stéphane AVRIL, Alain VAUTRIN, Patrice HAMELIN, and Yves SURREL, *France*
- Progress in ultrasonic testing of concrete  
Sandor POPOVICS, *USA*
- Internal structure of concrete with artificial aggregate  
Elsadeg A. ABDALLA and Wojciech RADOMSKI, *Libya and Poland*
- Influence of gas inflow surface on measured permeability of concrete  
Jacek ŚLIWIŃSKI, Tomasz TRACZ and Aleksander KOZAK, *Poland*
- Influence of coarse aggregate size and cement matrix strength on stress-crack width relationship  
Jun ZHANG, Qian LIU and Lin WANG, *P.R.China*
- Prediction of non-uniform multiple cracking in polymer composites using an energy-based probabilistic model  
K. P. HERRMANN and Junqian ZHANG, *Germany and P.R.China*
- Fracture mechanics and plasticity modelling of the split cylinder test  
John Forbes OLESEN, Lennart ØSTERGAARD and Henrik STANG, *Denmark*
- Fatigue sensitivity analysis for the curved layered composite beam  
Łukasz FIGIEL and M. KAMIŃSKI, *Germany and Poland*
- Durability of new polymer mortar using waste expanded polystyrene solution  
N. CHOI and Y. OHAMA, *Korea and Japan*
- Application of experimental – statistical modeling to evaluate influence of amount and grading of sand and regime of burning upon compressive strength and water absorbability of building ceramics  
Beata BACKIEL-BRZOZOWSKA, *Poland*

The pultrusion technology for the production of fabric-cement composites  
Alva PELED and Barzin MOBASHER, *Israel and USA*

Method of determination of creep and shrinkage of SFRC  
Dušan SPŮRA, Jan VODIČKA, Jiří KRÁTKÝ, and Marian ABRAMOWICZ, *Czech Republic and Poland*

Lime mortars with natural fibres  
Miloš F. DRDÁČKÝ and Dagmar MICHONNOVA, *Czech Republic*

Effects of accelerated curing conditions on strength properties of epoxy-modified mortars without hardener  
Y. OHAMA and S. TAKAHASHI, *Japan*

FRP debonding from a concrete substrate: conventional belief and new findings  
Christopher K.Y. LEUNG, *Hong-Kong*

Performance characteristics of basalt rebar reinforced concrete beams  
V. RAMAKRISHNAN and Ramesh K. PANCHALAN, *USA*
