

Bloodshed Dev C++

Installation and configuration

October 1, 2013

1 Installation

1. Go to <http://www.bloodshed.net/dev/devcpp.html>.
2. Download (9.1 MB) “Dev-C++ 5.0 beta 9.2 (4.9.9.2) (9.0 MB) with Mingw/GCC 3.4.2” (the first option).
3. Install to a path without spaces (e.g. standard “C:\Dev-Cpp”). Answer with yes all the installation questions.

2 Configuration

Go to menu Tools→Compiler Options (Narzędzia→Opcje kompilatora).

1. Set the compiler options (the first text box) to “-g -fmessage-length=0” (this is for proper debugging information and for single-line error messages).
2. Check the “Add the following commands when calling compiler” checkbox.
