3 APPOINTMENTS

2017-2018	Professor, Deputy Head of the Department of Biosystems and Soft Matter, Institute of Fundamental Technological Research, Polish Academy of Science, Warsaw, Poland.
2010-2017	Professor, Deputy Head of the Department of Mechanics and Physics of Fluids, Institute of Fundamental Technological Research, Polish Academy of Science, Warsaw, Poland.

2009-2013	Deputy Director for Research, Institute of Fundamental Technological Research, Polish Academy of Science, Warsaw, Poland.
2001 – 2009	Head of the Department of Mechanics and Physics of Fluids, Institute of Fundamental Technological Research, Polish Academy of Science, Warsaw, Poland.
1995 – 2001	Head of the Division of Thermal and Free Surface Flows, Center of Mechanics, Institute of Fundamental Technological Research, Polish Academy of Science (IPPT PAN), Warsaw, Poland.
June 1993 – June 1994	Wissenschaftlicher Mitarbeiter (Senior Research Associate), Max-Planck-Institut für Strömungsforschung, Göttingen, Germany
March 1988 – May 1993	Wissenschaftlicher Mitarbeiter (Senior Research Associate), Institut für Angewandte Mechanik und Strömungsphysik, Georg-August-Universität, Göttingen.
Oct. 1985 – Feb. 1988	Visiting Scholar, research fellowship by Max-Planck-Institut, Göttingen.
Sept. 1969 – June 1987	Asystent (Research Assistant) and Adiunkt (Senior Research Associate), Institute of Fundamental Technological Research, Polish Academy of Science (IPPT PAN), Department of Fluid Mechanics, Warsaw, Poland.

4 SCHOLARSHIPS

Aug. – Sept. 1978	Visiting scholar at the Delft University, Holland (by Prof. J.A. Steketee). Hot-Wire Anemometry.
Nov. – Dec. 1980	Visiting scholar at the Max-Planck-Institut für Strömungsforschung, Göttingen (by Prof. E.-A. Müller). Investigations of two-phase flow with help of Laser-Doppler-Anemometry.
Mar. – June 1982	Visiting scholar at the Stanford University (by Prof. A. Acrivos). M. Curie-Sklodowska joined Polish-American project on sedimentation and flow of suspensions.
Oct. 1985 – Feb. 1988	Scientific fellowship from the Max-Planck-Society, Institut für Strömungsforschung, Göttingen (by Prof. E.-A. Müller). Experimental modeling of fuel injection and evaporation; fuel film deposition on the walls of engine manifolds.
Feb. – Apr. 1993	Visiting Fellow at the University of New South Wales, School of Mechanical and Manufacturing Engineering. (by Prof. G. de Vahl Davis). Experimental and numerical investigation of the natural convection.
Nov. 1993	Short visit at the Israel Institute of Technology, TECHNION, Dept. of Mechanical Engineering (by Prof. A. Yarín), Haifa, Israel. Investigations of liquid jet instability.

Mar. 1995 – Jan. 1996	Visiting Fellow at the Israel Institute of Technology, Lady Davis Fellowship, TECHNION, Dept. of Aerospace Engineering (by Prof. M. Wolfshtein), Haifa, Israel. Investigations of droplet combustion. Teaching (two semesters course) Advanced Methods in Aerodynamics.
April 1997	Visiting Professor at the University Paris XI (Orsay), lecturing: “Advanced experimental methods in fluid mechanics”.
April-May 1998	Visiting Professor at the University “La Sapienza” and Roma Tre (Rome), application of the PIV method for combustion flow
Nov. 1998	Short visit at the Israel Institute of Technology, TECHNION, Dept. of Mechanical Engineering (by Prof. G. Hetsroni), Haifa, Israel. Joint project on turbulent flow in the channel
March 1999	Visiting Professor at the University Paris XI (Orsay)
7 months within 1999 - 2002	Visiting Scholar at the Arizona State University, Joint atmospheric research, VTMX2000 program
June 2000	Short visit at the Israel Institute of Technology, TECHNION, Dept. of Mechanical Engineering (by Prof. G. Hetsroni), Haifa, Israel. Joint project on turbulent flow in the channel
October 2001	Short visit at the Israel Institute of Technology, TECHNION, Dept. of Mechanical Engineering (by Prof. G. Hetsroni), Haifa, Israel. Joint project on turbulent flow in the channel
March 2002	Visiting Professor at the University Paris XI (Orsay)
Nov. 2002	Short visit at the Israel Institute of Technology, TECHNION, Dept. of Aerospace Engineering (by Prof. Y. Levy), Haifa, Israel. Joint 5FP EU project on combustion FLOXCOM
Mar - April 2003	Visiting Professor at the University of New South Wales (Sydney), CFD Group of Prof. E. Leonardi
Dec 2007 - Jan 2008	Visiting Professor at the University of New South Wales (Sydney), CFD Group of Prof. E. Leonardi

5 RESEARCH EXPERIENCE

1969 – 1985	Research work at the Institute of Fundamental Technological Research (Warsaw), during the experimental study towards Ph.D. degree on low Reynolds number flow of suspensions; experimental investigations of the jet break-up, modeling of the fibre spinning.
1986 – 1987	Research work at the Max-Planck-Institut, Evaporation of fuels and retrograde fluids; atomisation of fuels; investigation of natural convection.
1988 – 1991	Research grants from Deutsche Forschungsgemeinschaft through the University Göttingen: <i>Experimental investigations of the instabilities of the evaporating liquid jets</i> (DFG 201/18) and
1991 – 1993	<i>Dynamic properties of the jets of liquid mixtures</i> (DFG201/20).

1995 – 1996	9 months Lady Davis Fellowship, Application of PIV and image processing for diagnostics of flow with combustion, Israel Institute of Technology, TECHNION, Haifa
1996 – 2010	Research collaboration (project conjoints) IPPT PAN – LIMSI CNRS, <i>L'étude numérique et expérimentale de la dynamique du gossissement et du décrochement des bulles de vapeur dans le cas de l'ébullition hétérogène</i>
1998 – 2002	Research collaboration IPPT PAN - TECHNION in framework of Polish Academy of Sciences – Israeli Academy of Sciences agreement, on <i>Turbulent thermal heat transfer in a channel flow</i>
1999 – 2002	Research collaboration with Arizona State University (USA) on <i>Environmental Fluid Dynamics</i>
Other activities	Nonlinear dynamic of the oscillating droplet; evaporation of droplets; evaporation induced surface instabilities; image processing; high-Speed video imaging; flow visualisation; tracking of tracer particles in the flow; natural convection; convection with phase changes; Particle Image Velocimetry (PIV), liquid crystals thermography (PIT), computational fluid dynamics, micro-fluidics, microPIV, nanofibres, drug release, Brownian dynamics of nano-objects.

6 MAIN RESEARCH TOPICS

Keywords: Fluid mechanics, micro-fluidics, nanofibres, bioengineering, multiphase flow, free surface flow, thermally driven flow, flow with phase changes. Experimental and numerical methods in fluid mechanics.

- Experimental investigations of liquid jet break-up. Evidence of “super” thin liquid bridges between liquid jet and the droplet. Instability of evaporating jets, modeling of droplet and liquid jet evaporation. Evaporation of emulsions [9, 10, 13, 31, 35, 43-45], microflows [116,119,120], nanofibres [103,113,124,132,133,136,137,140,152,153,155,156].
- Experimental and numerical investigation of nonlinear droplet oscillations. Description of droplet deformation. Development of non-intrusive method to measure dynamic surface tension, measurements of the physical parameters of evaporating surface by oscillating droplet method [1, 18, 20, 21, 25, 26, 36, 37, 40, 42].
- Development of high speed video recording methods based on CCD “frame-transfer” camera and image processor. Application of the method for investigation of droplets and jet instabilities [8, 11, 15, 19, 32].
- Experimental and numerical investigation of natural convection, identification of new flow structures; investigation of natural convection in presence of phase change (freezing) [12, 14, 16, 24, 27, 29, 41, 46-54,67].
- Development of new experimental technique for instantaneous measurement of temperature and velocity two-dimensional fields in thermal flow, based on application of liquid crystal as tracers [7, 14, 29, 34,48,49,89,94,101,102,121,154].

- Investigations of low Reynolds number two-phase flow in tubes (solid and liquid suspensions). Application of new measuring techniques for measuring velocity and particle concentration, laser doppler and ultrasound doppler anemometry [1-6].

7 EDUCATIONAL EXPERIENCE

Direct supervision of 7 M.Sc. and 3 Ph.D. students graduated at the Georg-August University Göttingen 1985-1994; 3 Ph.D. and 5 M.Sc. students at Warsaw University of Technology. Supervisor of 6 Ph.D. students at IPPT PAN.

Graduate courses:

- *Advanced Methods in Aerodynamics* (two semesters) given at TECHNION, Dept. of Aerospace Engineering, 1995-1996.
- *Advanced Experimental Methods in Fluid Mechanics* (professor invite) short courses given at University Paris XI (Orsay), 1997, 1999, 2001.
- *Experiment and Modelling Solidification Processes* (professor invite) short courses given at University Roma 3 and La Sapienza, 2001.
- *Experimental Methods for Quantitative Analysis of Thermally Driven Flows*, lecturer and coordinator of the CISM course on Phase Change with Convection, Udine (Italy), 2002.
- *Contemporary Experimental Methods in Fluid Mechanics* advanced course given at Technical University of Czestochowa, 2011
- *Nanofluids and Nanofibres* advanced course given at Technical University of Krakow, 2014

9 HONOURS

Scientific Secretary, XVIIIth Symposium on Advanced Problems and Methods in Fluid Mechanics, Sobieszewo (Poland), Sept.1985.
Scientific Secretary, Publication Subcommittee, IUTAM Symposium on Adiabatic Waves in Liquid-Vapour Systems, Göttingen (Germany), Aug. 1989.
Invited paper at 2nd European Fluid Mechanics Conference, Warsaw, September 1994
Invited paper at Euromech Colloquium 355 on Interfacial Instabilities, Paris, September 1996
The Polish Academy of Sciences Award (*Nagroda Wydziału IV PAN*) for research on jets and droplets, December 1996.
International Symposium on Advances in Computational Heat Transfer CHT97, Cesme 1997, member of the Scientific Committee and the expository review lecture.
European Science Foundation project on Applied Mathematics for Industrial Flow Problems, Polish member of the Steering Committee, member of the Scientific Committee, “International AMIF conferences”, 1998, 2000, 2002
International Conference on Computational Heat and Mass Transfer, Cyprus, April 1999, member of the Scientific Committee.
Invited paper at FLUVISU 99, 8me colloque nationale de visualisation et de traitement d’images en mecanique des fluides, Toulouse, June 1999.
Chairman of the Euromech Colloquium 406 “Image processing methods in applied mechanics”, Warsaw, May 1999.
Chairman of the European Science Foundation AMIF Workshop PCC99 “Phase Change with Convection”, Warsaw, June 1999.
Member of the Committee of Mechanics of the Polish Academy of Sciences, 1999 - present
Member of the International Board “Int. Flow Visualization Symposium”, 2000 - present
Member of the Scientific Committee, “International Symposium on Advances in Computational Heat Transfer CHT01”, Australia 2001.
Member of the Scientific Committee and invited paper at “International Symposium on Imaging and Visualization in Transport Phenomena VIM-01”, Antalya, 2002.
Silver Cross Award by President of Poland for scientific achievements, 2002
Coordinator of “Phase Change with Convection”, CISM Advanced School, Udine, 2002.
Secretary General, “International Congress of Theoretical and Applied Mechanics”, Warsaw, 2004.
Member of the XCCC IUTAM, 2004 - 2012
Member of the EFMCC Euromech, 2007 - 2012

Member of the Scientific Council of the International Centre for Mechanical Sciences, Udine (Italy), 2009 -

Member of ECCOMAS Computational Fluid Dynamics Section, 2010 -

Chair of the Fluid Mechanics Division of the Committee of Mechanics PAN, 2007 - 2015

Member of the Fluid Mechanics Division of the Committee of Mechanics PAN, 2019 - 2023

Member of the Fluid Mechanics Division of the Committee of Mechanics PAN, 2024 - 2027
